

Errata for Theory and Technique of Electronic Music

These errors appear in the printed book as well as the online draft:

Section 1.7, paragraph 2: “More generally, any sum of sinusoids with frequencies $2\pi k/\omega$...” The expression should read “ $k\omega$ ”.

Section 2.2. “...sawtooth wave of period M ”... This should be specified as “ M samples”

Figure 8.23 claims to show phase responses of all-pass filters but in fact shows the negative of the phase responses (the phase delays) instead.
